

Diamond A Suction Base Extension

Product Components

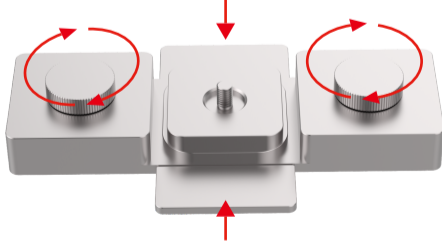

Suction base extension

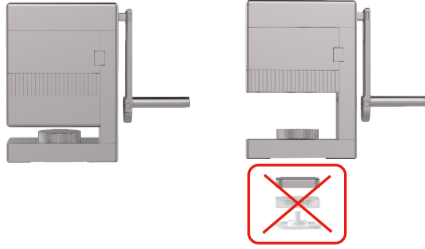

Assembly

1. Find a smooth, flat, clean surface on which to place the suction base. Peel off the protective plastic from the suction cups. Slightly loosen the two suction cup fixing knobs, press the knobs firmly with your hand to release air, and then tighten the knobs clockwise.
2. Attach the two pads to the base as shown in the image.

3. Remove the original suction cup set (suction cup cover, suction cup cushion, and suction cup) from the Diamond A's grinder, keeping only its suction cup fixing knob.

4. Position the Diamond A grinder onto the suction base and tighten the original suction cup fixing knob clockwise to secure it in place.
